

# Memo

Date: August 29, 2025

To: Jennifer Harmon, Diablo Engineering Group

From: Robert Rees and Lam Ngo, Fehr & Peers

**Subject: 40th Street Multimodal Project – Truck Activity Analysis Memo**

---

The City of Emeryville approved the 40<sup>th</sup> Street Multimodal Project (“Project”) in March 2020. The engineering design was presented to the City Council in July 2023, and at that time the City Council directed staff to proceed with the Project, expanding it to include Shellmound Street to Christie Avenue, and requesting the incorporation of the additional safety features listed below that would further separate motor vehicle movements from pedestrian and bicycle movements.

- Remove the right-turning traffic from Watts Street to 40<sup>th</sup> Street.
- Install a cul-de-sac at Haven Street/40<sup>th</sup> Street.
- Remove right turning traffic from Holden Street to 40<sup>th</sup> Street.
- Install a cul-de-sac at Hubbard Street/40<sup>th</sup> Street.

The truck activity analysis presented in this memorandum examines truck-related activities using local streets between 40<sup>th</sup> Street and Park Avenue that could be impacted by these safety feature changes. Observations indicate that trucks use Watts, Holden, and Hubbard Streets, so the truck analysis focused on these streets plus Horton Street.

This memorandum presents the truck activity data collection, review of existing truck activity along side streets between Park Avenue and 40<sup>th</sup> Street and provides general recommendations regarding truck routing and daylighting at these side street locations.

## Data Collection

Truck circulation activity along 40<sup>th</sup> Street was observed and collected for a 14-day period between February 23 and March 8, 2023. This data was collected at four side street locations between Park Avenue and 40<sup>th</sup> Street:

- Watts Street
- Holden Street
- Hubbard Street
- Horton Street

Video cameras were placed pointing north at the 40<sup>th</sup> Street intersections crossing the side streets and pointing south at the Park Avenue intersections crossing the side streets to collect movements in both directions of travel. These observations included truck entering and existing movements, truck sizes, and activity type (parking, passing through, or loading/unloading) and duration of activity.

- The 'Loading/Unloading' category in the truck survey captures all vehicles that parked along the curb or in-street and loaded/unloaded within the observed street segment as well as trucks that accessed private property.
- The 'Parking' category in the truck survey captures all vehicles that parked along the curb or in-street without loading activities.
- The 'Passing Through' category in the truck survey captures all vehicles that did not stop on the observed segment for either parking or loading activities. While this data does not differentiate between local circulation trips serving businesses on adjacent blocks and through-traffic, our analysis conservatively assumes a portion of these truck trips will be rerouted onto designated truck routes such as Hollis Street, San Pablo Avenue, and 40th Street by way of Park Avenue or 45th Street. This assumption informs the recommendations for proactive traffic management and wayfinding signage.

**Attachment A** details the collected daily truck activity data from 6 AM to 6 PM at each side street location.

## Truck Activity Summary

The analysis focused on weekday counts to present a conservative review of truck flow on side streets. The video footage and truck activity spreadsheets provided by the data vendor firm were reviewed to produce a summary of recorded truck activity by side street location and truck classification. **Attachment B** shows the typical vehicle profiles by truck classification, including the following:

- Delivery Truck includes delivery trucks and vans from UPS, FedEx, etc.
- Single-Unit Truck includes trucks with no separate trailer.
- Truck with Trailer includes trucks with separate trailers attached.

**Table 1** documents the maximum and minimum recorded weekday truck counts by activity and location over the 10-day observation period. **Attachment C** describes the total observed directional truck traffic along each side street over the 10 weekdays between February 23 and March 8, 2023, between 6 AM and 6 PM on each day and illustrates the activities i.e., parking, pass-through, loading/unloading by truck type. Information in Table 1 will be described in the subsequent sections of this memorandum.

**Table 1: Range of Daily Truck Activity over 10-Day Weekday Survey**

| Side Street Location | Truck Classification | Number of Trucks by Activity Type during Typical Weekday (between 40 <sup>th</sup> Street and Park Avenue) |         |                 |         |                   |         |
|----------------------|----------------------|--|---------|-----------------|---------|-------------------|---------|
|                      |                      | Parking  |         | Passing Through |         | Loading/Unloading |         |
|                      |                      | Maximum  | Minimum | Maximum         | Minimum | Maximum           | Minimum |
| Watts Street         | Single-Unit Truck    | 4  | 0       | 4               | 1       | 7                 | 2       |
|                      | Delivery Truck       | 5  | 0       | 3               | 0       | 8                 | 2       |
|                      | Truck with Trailer   | 1  | 0       | 1               | 0       | 2                 | 0       |
| Holden Street        | Single-Unit Truck    | 6  | 1       | 7               | 0       | 6                 | 1       |
|                      | Delivery Truck       | 2  | 0       | 4               | 0       | 2                 | 0       |
|                      | Truck with Trailer   | 0  | 0       | 2               | 0       | 2                 | 0       |
| Hubbard Street       | Single-Unit Truck    | 3  | 0       | 10              | 3       | 3                 | 0       |
|                      | Delivery Truck       | 3  | 0       | 8               | 0       | 0                 | 0       |
|                      | Truck with Trailer   | 1  | 0       | 2               | 0       | 1                 | 0       |
| Horton Street        | Single-Unit Truck    | 2  | 0       | 60              | 30      | 3                 | 0       |
|                      | Delivery Truck       | 2  | 0       | 18              | 7       | 2                 | 0       |
|                      | Truck with Trailer   | 1  | 0       | 17              | 4       | 2                 | 0       |

Note: Truck activity was collected between 40<sup>th</sup> Street and Park Avenue February 23 through March 8, 2023.  
Source: Fehr & Peers, 2025.

The following sections describe the truck activity along each side street location between 40<sup>th</sup> Street and Park Avenue over the 10-weekday period.

## Watts Street between 40<sup>th</sup> Street and Park Avenue

### Street Characteristics and Signage

Watts Street between 40<sup>th</sup> Street and Park Avenue is a two-lane roadway—one lane in each direction. There is a combination of parallel and perpendicular parking. At 40<sup>th</sup> Street, Watts Street is stop-controlled and right-in/right-out, and at Park Avenue, Watts Street is all-way stop-controlled. Trucks are allowed to use Watts Street and there are no posted truck turn restrictions at either 40<sup>th</sup> Street or Park Avenue.

Existing signage at Holden Street and 40<sup>th</sup> Street.

Existing signage at Watts Street and Park Avenue.

## Truck Activity

Trucks (delivery trucks, single-unit trucks, tractor-trailer trucks) were observed using Watts Street during the 10-day observation period. The single-unit and delivery trucks were observed to easily maneuver between Watts Street and 40<sup>th</sup> Street (right turns) and Park Avenue (right and left turns). Large tractor-trailer trucks crossed into adjacent/opposing lanes to maneuver to and from Watts Street; even so, the tractor-trailer trucks were able to negotiate right- and left-turning movements to and from Park Avenue.

### TOTAL TRUCK ACTIVITY

Over 10 weekdays between 6 AM and 6 PM along Watts Street, there were a total of 160 recorded trucks. **Table 2** describes the truck volumes by activity and direction. Key findings:

- About 53% of the total recorded trucks were loading and unloading, 26% were parking, and 21% were passing through without stopping.
- Over 60% of total recorded trucks entered Watts Street from Park Avenue.
- About 6% of the total recorded trucks were tractor-trailers, 44% were single-unit trucks, and 50% were delivery trucks.

## RANGE OF DAILY TRUCK ACTIVITY

Table 1 summarizes the minimum and maximum truck activities observed on any given day during the 10-day observation period. On any given day:

- No more than two tractor-trailer trucks were observed being loaded/unloaded on Watts Street. No more than one tractor-trailer truck was observed parking on Watts Street and no more than one was observed passing through without stopping. There were observation days with no observed tractor-trailer activity.
- Between 4 and 15 single-unit and delivery trucks were observed being loaded/unloaded on Watts Street. Up to 9 of these truck types were observed parking on Watts Street. There were observation days with no observed parking activity. One to 7 were observed passing through without stopping.

**Table 2: Recorded Truck by Activity along Watts Street – 10 Days**

| Activity                             | Parking   | Passing Through | Loading/Unloading | Total      |
|--------------------------------------|-----------|-----------------|-------------------|------------|
| Single-Unit Truck<br><b>(Total)</b>  | <b>12</b> | <b>22</b>       | <b>37</b>         | <b>71</b>  |
| - Northbound                         | 6         | 11              | 19                | 36         |
| - Southbound                         | 6         | 11              | 18                | 35         |
| Delivery Truck <b>(Total)</b>        | <b>29</b> | <b>7</b>        | <b>44</b>         | <b>80</b>  |
| - Northbound                         | 11        | 3               | 6                 | 20         |
| - Southbound                         | 18        | 4               | 38                | 60         |
| Truck with Trailer<br><b>(Total)</b> | <b>1</b>  | <b>4</b>        | <b>4</b>          | <b>9</b>   |
| - Northbound                         | 1         | 3               | 3                 | 7          |
| - Southbound                         | 0         | 1               | 1                 | 2          |
| <b>Total (Both Directions)</b>       | <b>42</b> | <b>33</b>       | <b>85</b>         | <b>160</b> |

Note: Truck activity was collected between 40<sup>th</sup> Street and Park Avenue between February 23, 2023, and March 8, 2023.

## Holden Street between 40<sup>th</sup> Street and Park Avenue

### Street Characteristics and Signage

Holden Street between 40<sup>th</sup> Street and Park Avenue is a two-lane roadway with one lane in each direction with parallel parking. At 40<sup>th</sup> Street, Holden Street is stop-controlled and right-in/right-out, and at Park Avenue, Holden Street is all-way stop-controlled. Trucks are allowed to use Holden Street and there are posted truck turn restrictions at Park Avenue, at all intersection approaches, which state that trucks are prohibited from left or right turns at the Park Avenue intersection. The signs direct truck drivers to use either Hollis Street or Halleck Street to access the area. There are no truck turn restriction signs at 40<sup>th</sup> Street. There is also street sweeping/no parking signs on both sides of Holden Street.

Existing signage at Holden Street and 40<sup>th</sup> Street.

Existing truck signage at Holden Street and Park Avenue.

## Truck Activity

Trucks (delivery trucks, single-unit trucks, tractor-trailer trucks) were observed using Holden Street during the 10-day observation period. Trucks were observed turning to and from Holden Street at Park Avenue even though there are truck turn prohibition signs posted at the intersection on all four approaches. As shown in Attachment A, over the 10-day observation period there were about 86 total trucks (10 tractor-trailers, 63 single-unit trucks, and 13 delivery trucks) that made prohibited left or right turns at the Holden Street/Park Avenue intersection. The single-unit and delivery trucks were observed to easily maneuver between Holden Street and 40<sup>th</sup> Street (right turns) and Park Avenue (right and left turns). The tractor-trailer trucks crossed into adjacent/opposing lanes to maneuver to and from Holden Street.

### TOTAL TRUCK ACTIVITY

Over 10 weekdays between 6 AM and 6 PM along Holden Street, there were a total of 127 recorded trucks. **Table 3** describes the truck volumes by activity and direction. Key findings:

- About 39% of the total recorded trucks were loading and unloading, 26% were parking, and 35% were passing through without stopping.
- Over 45% of total recorded trucks entered Holden Street from Park Avenue.
- About 10% of the total recorded trucks were tractor-trailers, 73% were single-unit trucks, and 17% were delivery trucks.

### RANGE OF DAILY TRUCK ACTIVITY

Table 1 summarizes the minimum and maximum truck activities observed on any given day during the 10-day observation period. On any given day:

- No more than two tractor-trailer trucks were observed being loaded/unloaded on Holden Street. No tractor-trailer trucks were observed parking on Holden Street and zero to two tractor-trailer trucks were observed passing through without stopping. There were observation days with no observed tractor-trailer activity.
- Between 1 and 8 single-unit and delivery trucks were observed being loaded/unloaded on Holden Street and 1 to 8 of these truck types were observed parking on Holden Street. No more than 11 were observed passing through without stopping. There were observation days with no observed trucks passing through.

**Table 3: Recorded Truck by Activity along Holden Street – 10 Days**

| Activity                             | Parking   | Passing Through | Loading/Unloading | Total      |
|--------------------------------------|-----------|-----------------|-------------------|------------|
| Single-Unit Truck<br><b>(Total)</b>  | <b>27</b> | <b>27</b>       | <b>38</b>         | <b>92</b>  |
| - Northbound                         | 16        | 8               | 30                | 54         |
| - Southbound                         | 11        | 19              | 8                 | 38         |
| Delivery Truck <b>(Total)</b>        | <b>6</b>  | <b>12</b>       | <b>4</b>          | <b>22</b>  |
| - Northbound                         | 1         | 4               | 1                 | 6          |
| - Southbound                         | 5         | 8               | 3                 | 16         |
| Truck with Trailer<br><b>(Total)</b> | <b>0</b>  | <b>5</b>        | <b>8</b>          | <b>13</b>  |
| - Northbound                         | 0         | 2               | 8                 | 10         |
| - Southbound                         | 0         | 3               | 0                 | 3          |
| <b>Total (Both Directions)</b>       | <b>33</b> | <b>44</b>       | <b>50</b>         | <b>127</b> |

Note: Truck activity was collected between 40<sup>th</sup> Street and Park Avenue between February 23, 2023, and March 8, 2023.  
Source: Fehr & Peers, 2025.

## Hubbard Street between 40<sup>th</sup> Street and Park Avenue

### Street Characteristics and Signage

Hubbard Street between 40<sup>th</sup> Street and Park Avenue is a two-lane roadway—one lane in each direction with a combination of parallel and perpendicular parking. At 40<sup>th</sup> Street, Hubbard Street is stop-controlled and right-in/right-out, and at Park Avenue, Hubbard Street is all-way stop-controlled. Trucks are allowed to use Hubbard Street and there are posted truck turn restrictions at Park Avenue,

at all intersection approaches, which state that trucks are prohibited from left or right turns at the Park Avenue intersection. The signs direct truck drivers to use either Hollis Street or Halleck Street to access the area. There are no truck turn restriction signs at 40<sup>th</sup> Street.

Existing signage at Hubbard Street and 40<sup>th</sup> Street.

Existing truck signage at Hubbard Street and Park Avenue.

## Truck Activity

Trucks (delivery trucks, single-unit trucks, tractor-trailer trucks) were observed using Holden Street during the 10-day observation period. Trucks were observed turning to and from Holden Street at Park Avenue even though there are truck turn prohibition signs posted at the intersection on all four approaches. As shown in Attachment A, over the 10-day observation period there were about 137 total trucks (8 tractor-trailers, 85 single-unit trucks, and 44 delivery trucks) that made prohibited, left, or right turns at the Hubbard Street/Park Avenue intersection. The single-unit and delivery trucks were observed to easily maneuver between Hubbard Street and 40<sup>th</sup> Street (right turns) and Park Avenue (right and left turns). The tractor-trailer trucks crossed into adjacent/opposing lanes to maneuver to and from Holden Street.

## TOTAL TRUCK ACTIVITY

Over 10 weekdays between 6 AM and 6 PM along Hubbard Street, there were a total of 150 recorded trucks. **Table 4** describes the truck volumes by activity and direction. Key findings:

- About 10% of the total recorded trucks were loading and unloading, 16% were parking, and 74% were passing through without stopping.
- Over 48% of total recorded trucks entered Hubbard Street from Park Avenue.
- About 8% of the total recorded trucks were tractor-trailers, 62% were single-unit trucks, and 30% were delivery trucks.

### RANGE OF DAILY TRUCK ACTIVITY

Table 1 summarizes the minimum and maximum truck activities observed on any given day during the 10-day observation period. On any given day:

- No more than one tractor-trailer truck was observed being loaded/unloaded on Hubbard Street, no more than one tractor-trailer truck was observed parking on Hubbard Street and no more than two tractor-trailer trucks were observed passing through without stopping. There were observation days with no observed tractor-trailer activity.
- Between 1 and 3 single-unit and delivery trucks were observed being loaded/unloaded on Hubbard Street. No more than 6 of these truck types were observed parking on Hubbard Street. There were observation days with no observed truck parking activity. Between 3 and 18 trucks were observed passing through without stopping.

**Table 4: Recorded Truck by Activity along Hubbard Street – 10 Days**

| Activity                             | Parking   | Passing Through | Loading/Unloading | Total      |
|--------------------------------------|-----------|-----------------|-------------------|------------|
| Single-Unit Truck<br><b>(Total)</b>  | <b>9</b>  | <b>70</b>       | <b>14</b>         | <b>93</b>  |
| - Northbound                         | 3         | 38              | 9                 | 50         |
| - Southbound                         | 6         | 32              | 5                 | 43         |
| Delivery Truck <b>(Total)</b>        | <b>13</b> | <b>32</b>       | <b>0</b>          | <b>45</b>  |
| - Northbound                         | 5         | 19              | 0                 | 24         |

## Horton Street between 40<sup>th</sup> Street and Park Avenue

### Street Characteristics and Signage

Horton Street between 40<sup>th</sup> Street and Park Avenue is a two-lane roadway with one lane in each direction with parallel parking. At 40<sup>th</sup> Street, Horton Street is signalized with all movements allowed, and at Park Avenue, Horton Street is all-way stop-controlled. Trucks are allowed to use Horton Street and there are posted truck turn restrictions at Park Avenue, at all intersection approaches, which

state that trucks are prohibited from left or right turns at the Park Avenue intersection. The signs direct truck drivers to use either Hollis Street or Halleck Street to access the area. There are no truck turn restriction signs at 40<sup>th</sup> Street. Horton Street is also a designated bicycle boulevard.

Existing signage at Horton Street and 40<sup>th</sup> Street.

Existing truck signage at Horton Street and Park Avenue.

## Truck Activity

Trucks (delivery trucks, single-unit trucks, tractor-trailer trucks) were observed using Horton Street during the 10-day observation period. Trucks were observed turning to and from Horton Street at Park Avenue even though there are truck turn prohibition signs posted at the intersection on all four approaches. As shown in Attachment A, over the 10-day observation period there were about 324 total trucks (29 tractor-trailers, 61 single-unit trucks, and 234 delivery trucks) that made prohibited, left, or right turns at the Horton Street/Park Avenue intersection. The single-unit and delivery trucks were observed to easily maneuver between Horton Street and 40<sup>th</sup> Street (right turns) and Park Avenue (right and left turns). The tractor-trailer trucks crossed into adjacent/opposing lanes to maneuver to and from Horton Street.

### TOTAL TRUCK ACTIVITY

Over 10 weekdays between 6 AM and 6 PM along Hubbard Street, there were a total of 150 recorded trucks. **Table 5** describes the truck volumes by activity and direction. Key findings:

- About 3% of the total recorded trucks were being loaded/unloaded, 2% were parking, and 95% were passing through without stopping.

- Over 38% of total recorded trucks entered Horton Street from Park Avenue.
- About 15% of the total recorded trucks were tractor-trailers, 64% were single-unit trucks, and 21% were delivery trucks.

### RANGE OF DAILY TRUCK ACTIVITY

Table 1 summarizes the minimum and maximum truck activities observed on any given day during the 10-day observation period. On any given day:

- No more than two tractor-trailer trucks were observed being loaded/unloaded on Horton Street and no more than one tractor-trailer truck was observed parking on Horton Street. There were observation days with no observed tractor-trailer activity. Between 4 and 17 tractor-trailer trucks were observed passing through without stopping.
- No more than 5 single-unit and delivery trucks were observed being loaded/unloaded on Horton Street and no more than 4 of these truck types were observed parking on Horton Street. There were observation days with no observed truck parking activity. Between 37 and 78 were observed passing through without stopping.

**Table 5: Recorded Truck by Activity along Horton Street – 10 Days**

| Activity                             | Parking   | Passing Through | Loading/Unloading | Total      |
|--------------------------------------|-----------|-----------------|-------------------|------------|

## Impacts of Project and Recommendations

Over the 10-weekday period from February 23 to March 8, 2023, there were 1,171 total recorded truck observations using Watts Street (14%), Holden Street (11%), Hubbard Street (13%), and Horton Street (62%) between Park Avenue and 40<sup>th</sup> Street. Many truck trips were turning right and left at Park Avenue even though there are posted truck turn restriction signs at Holden Street, Hubbard Street, and Horton Street. **Table 6** summarizes the total number of prohibited movements observed at the Park Avenue intersections.

**Table 6: Recorded Prohibited Truck Turns at Park Avenue – 10 Days**

| Activity            | Single-Unit Truck | Delivery Truck | Tractor-Trailer | Total      |
|---------------------|-------------------|----------------|-----------------|------------|
| Holden Street       | 63                | 13             | 29              | 86         |
| Hubbard Street      | 85                | 44             | 8               | 137        |
| Horton Street       | <b>61</b>         | <b>234</b>     | <b>10</b>       | <b>324</b> |
| <b>10-Day Total</b> | <b>209</b>        | <b>291</b>     | <b>47</b>       | <b>547</b> |

Note: Truck activity was collected between 40<sup>th</sup> Street and Park Avenue between February 23, 2023, and March 8, 2023.

Source: Fehr & Peers, 2025.

The Project would change truck route patterns due to turn restrictions intended to increase safety where local streets cross the two-way cycle track at 40<sup>th</sup> Street. These changes would result in businesses located on these streets (Watts Street, Holden Street, and Hubbard Street) needing to re-route trucks accessing their sites.

- Removing the southbound right-turning traffic from Watts Street to 40<sup>th</sup> Street would reroute 62 northbound trucks (35 single-unit trucks, 20 delivery trucks, and 7 tractor-trailer trucks) over the 10-day observation period.
- Removing the southbound right-turning traffic from Holden Street to 40<sup>th</sup> Street would reroute 68 northbound trucks (52 single-unit trucks, 6 delivery trucks, and 10 tractor-trailer trucks) over the 10-day observation period.
- Adding a cul-de-sac at Hubbard Street/40<sup>th</sup> Street would reroute 80 northbound trucks (50 single-unit trucks, 24 delivery trucks, and 6 tractor-trailer trucks) turning right from 40<sup>th</sup> Street over the 10-day observation period.
- Adding a cul-de-sac at Hubbard Street/40<sup>th</sup> Street would reroute 42 southbound trucks (29 single-unit trucks, 8 delivery trucks, and 5 tractor-trailer trucks) turning from Hubbard Street onto 40<sup>th</sup> Street over the 10-day observation period.

As shown in Attachment A, many of these observed trucks that would be rerouted pass through the local streets including Watts Street (16 trucks), Holden Street (30 trucks), and Hubbard Street (61 northbound and 50 southbound trucks) between 40<sup>th</sup> Street and Park Avenue without stopping. But local businesses on each of these streets have documented truck loading and parking activities, so trucks accessing the local businesses would need to reroute their trucks.

**Attachment D** illustrates the existing truck route patterns for Watts Street, Holden Street, and Hubbard Street as well as the suggested truck route changes with the Project for trucks. To accommodate these route changes, the cul-de-sac turnarounds at Hubbard Street and Haven Street as well as the half-closures at Watts Street and Holden Street are being designed to accommodate the turning radii of emergency vehicles, large delivery vehicles (SU-30), and WB-40 trucks.

Consider the following truck-related changes:

- Consider improving area signing for truck drivers so that turn restrictions are more intuitive.
- Consider truck signage for drivers to find their way to their intended street.

- Consider modifying truck turn restrictions on the Park Avenue corridor to allow smaller vehicles e.g., single-unit (SU-30) and delivery trucks while providing turn restrictions for trucks with trailers. And use more intuitive signs to inform truck drivers.
